

50. (New) The polymer composition according to claim 49, wherein the polymer or copolymer has a glass transition temperature of between -150 and +300°C.

51. (New) The polymer composition according to claim 49, further comprising at least one coupling agent or at least one recovery agent.

### REMARKS

The preliminary amendments are filed to comply with the claims structure and wording according to the United States Patent law. It is asserted that these amendments do not add new matter. Support for these amendments can be found in the specification and claims as originally filed. Entry of these amendments is respectfully requested.
